

ANNOUNCING

Bravo Probiotic Suppositories

Now available in the US from BioPure

Bravo Probiotic Suppositories offer improved microbiome support with 42 strains of living microorganisms per application.

BioPure is the only US based manufacturer of Bravo Probiotic Suppositories.* Our product is formulated using a careful preparation of Bravo Probiotic Powder and 100% organic, food-grade cocoa butter to offer a unique method of live probiotic delivery.

Each application releases 42 strains of living microorganisms, is formulated to be easily absorbed, and is made from organic freeze-dried colostrum, which is naturally rich in biologically active proteins and factors necessary to support the body's immune system.**

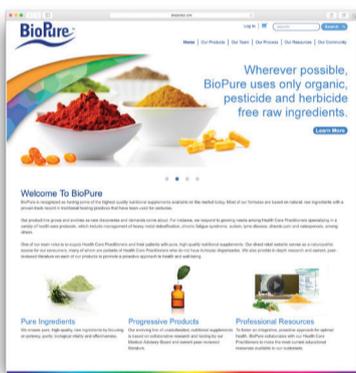

*The use of suppositories as a delivery system for nutritional supplements has not been approved by the FDA

** This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

WHAT'S NEW?

Major Website Upgrade

We are very proud to announce a major upgrade to our website and ecommerce store, available now at www.biopureus.com.

The new site provides a single online destination for practitioners and consumers alike. Once logged in, you can more easily find, learn about and select from our evolving catalog of high-quality products. In the coming weeks, additional features are planned including a library of resources and the ability to join and engage in discussion groups centered around topics of common interest.

Meet our team

We are pleased to introduce our new CEO: Joseph Annicchiarico

Joseph brings a wealth of experience in leading small companies, and deep expertise in the life sciences industry, including pharmaceutical product development and topical cosmetic formulation.

Joseph will apply the principles of his background in quality system regulations to strengthen BioPure's commitment to delivering pure, bioavailable, high-quality products.

Gut Microbes 2:2, 80-85; March/April 2011; © 2011 Landes Bioscience

Effect of 25 weeks of probiotic supplementation on immune function of HIV patients.

Giving Back

BioPure is proud to showcase non-profit organizations known for conscientious efforts to increase global environmental

awareness, purity and the quality of our food as well as decrease the carbon footprint of our materialistic lifestyles.

This month we're spotlighting the critical work being done by the Center for Honeybee Research and Hans-Günther Kern, a biodynamic advocator of natural food and sustainable agricultural practices.

Pollination is essential to creating a sustainable food supply, and much of that work is performed by honeybees. Without bees, we would not have viable, living seeds capable of reproducing themselves.
