BioPure™

A Bimonthly Natural Therapeutic Food Product Newsletter for BioPure Healing Products, LLC

May 2012

## Welcome . . .

*to the premiere issue of BioPure Healing Products' newsletter, Thrive. We are excited to share news and information about our products with you, and hope that you will find it valuable and interesting. Our goal is to release issues bimonthly. In order to improve your reading experience, we invite you to send us your feedback, questions, or requests for specific topics. And, if you are not already on our mailing list, please sign up to receive Thrive on a regular basis.*

## Menacing Microbes

With this first issue of Thrive, we thought we would highlight a few of BioPure's new products that have anti-microbial properties. Though many of the microbes we share this world with are harmless and/or beneficial to our health, there are those such as *E. coli*, *Staphylococcus*, and *tuberculosis* bacteria, *Candida* fungus, influenza virus, malaria parasites, and others, that can cause serious disease and even death. Heavy use of synthetic antibiotics is resulting in new, more virulent and drug-resistant strains of microbes to develop. Some bacteria can also form a sessile matrix or colony, called a "biofilm", with internal communication among its aggregate cells. When this occurs, the microorganisms are even more effective at interfering with proper functioning of our own cells, and become more resistant to antibiotics. In addition, many commonly prescribed drugs can create serious side-effects, especially with long-term use. For all these reasons, it is essential to explore natural alternatives that can be used alone or in conjunction with modern drugs. Many of those come in the form of natural herbs that have been used in traditional folk medicine for centuries. These natural substances often cause little or no side-effects, and their target may have less chance of developing immunity to them.

## In This Issue

Menacing Microbes  
Mimosa pudica  
Garlic  
Cistus incanus  
Upcoming Events  
Phospholipid Exchange

**Our new and improved  
websites are up and  
running:**

[www.biopureus.com](http://www.biopureus.com)

or

[www.retailbiopure.com](http://www.retailbiopure.com)

Either of these urls will take you to our retail site, accessible to anyone, including patients and the general public.

Leaves of *Mimosa pudica*

## "Bashful" plant doesn't shy away from microbes.

*Mimosa pudica* is one of  
the newest additions to

BioPure's product line. Its species name "pudica" comes from Latin meaning "shy" or "bashful". This herb has fascinated people for centuries because of its curious habit of folding its leaves inward in response to stimuli. These unusual movements among plants are referred to as "seismonastic", responding to touch, movement, or warming, and "nyctinastic", rhythmic closing and drooping of leaves at night-almost as if the plant is sleeping. Some botanists believe the "bashful" behavior of *Mimosa's* leaflets is a defense mechanism against grazing animals, thus making itself look withered and less appetizing, and helps to conserve moisture. Though we don't know exactly why *Mimosa* exhibits these movements, we do know that the plant contains powerful antioxidants and is an effective anti-parasitic agent. One quarter of a teaspoon of BioPure's *Mimosa pudica* powder mixed with water or your preferred drink, taken twice daily, may help the body get rid of persistent parasitic infections.

Hyatt Regency, Bellevue, WA

The 56th Annual  
**Northwest Naturopathic  
Physicians Conference**

May 17 - 20, 2012

Semiahmoo Resort, Blaine, WA

## Garlic wards off more than just vampires.

Not only is *Allium sativum*, commonly known as garlic, one of the world's favorite and most widely used culinary herbs, but it is also a potent anti-microbial and anti-inflammatory agent.

Garlic contains a strong antioxidant compound called "allicin" and can aid the immune system in fighting off bacterial and fungal infections, and ward off cardiovascular disease by relaxing vascular smooth muscle, dilating blood vessels, lowering blood pressure, and reducing inflammation and cholesterol. BioPure is now offering certified organic freeze-dried garlic in convenient capsules, each one providing a stable and generous 5.4 mg of allicin. This is twice the amount of bioactives in our old formula, and you get more capsules per bottle, at less cost per serving. **Another idea:** give your salad dressing or smoothie a super immunity boost by adding a half teaspoon of BioPure's loose freeze-dried powdered garlic. A liquid option of raw organic garlic in electrolyte solution is also available.

## Tea that tackles the common cold.

*Cistus incanus* tea is full of antioxidant, anti-inflammatory, and anti-bacterial health benefits that will not only boost the

immune system, but may also help the body's fight against rheumatic pain, acne, menstrual cramps, ulcers and other gastro- and urinary tract disorders. BioPure's *Cistus* (pronounced "kiss-tus") tea is 100% organic and comes with reusable organic cotton bags. Try compressing a used tea bag on a mouth sore to relieve soreness and speed healing, or wipe on acne to help reduce inflammation and fight bacteria. *Cistus* is a pink-flowering shrub, sometimes called the "gray-haired rock rose", and is native to the Mediterranean region. **Interesting facts:** Many years ago, goats were grazed in the hills where *Cistus* grew and the plant's sticky resin,

## Phospholipid Exchange

Take advantage of this terrific savings while it lasts. BioPure's Phospholipid Exchange is currently being discounted at 38% of the original cost. This liquid oral chelation formula contains Disodium EDTA encapsulated in tiny phospholipid microspheres. The phospholipids are essential to proper cell functioning and facilitate absorption of the metal chelator into cells throughout the body, including passage through the blood/brain barrier. In addition to being an excellent detoxification tool, Phospholipid Exchange also supports cardiovascular, liver, and nervous system health. Our inventory of Phospholipid Exchange is quickly running out and will eventually be replaced by our newer product, LipoHealth. LipoHealth contains the same beneficial ingredients in a convenient and stable powdered formula that is more cost-effective per serving for you.

called "labdanum", would adhere to the goat's fur. They would then be sheared, the fur boiled, and the resin would be collected off the surface of the water to be used in medicines, incense, and perfumes. Also, the sculpted false beards of the ancient Pharaohs were made of goat hair held together by the sticky labdanum resin and held on by a tied chord.

## Other anti-microbials carried by BioPure Healing Products.

**Neem** - Contains 3 antibiotic ingredients (Neem, Amla, and Guduchi) that work together to boost the immune system and help the body fight bacteria, viruses, and fungi.

**Artemesinin** - Contains camphor and essential oils. Highly effective in supporting the body against Malaria, Schistomiasis, and intestinal tract disorders.

*Both of these products are great additions to your first-aid kit when traveling in foreign countries.*

BioPure Healing Products, LLC is committed to providing our customers with the highest quality natural food supplements possible, with the utmost importance being placed on potency, purity, biological vitality, and effectiveness. Our products are not intended to diagnose, treat, cure, or prevent any disease.
